PRINCIPAL'S MESSAGE

Walkiria Cash Ward M.Ed

WELCOME TO **CALVARY ORLANDO CHRISTIAN ACADEMY!**

It is an honor to serve you and your family this upcoming year 2026-2027. Calvary Orlando Christian Academy has been a prayer foundation for all children to hear about Jesus Christ as the center of learning and life applications. At COCA, every child is unique and capable to reach their full potential in God's unique gifting and design.

We will make sure your child learns the core academic subjects while still having elective opportunities such as Foreign Languages, Physical Education, and Fine Arts. Jesus is the purpose of Calvary Orlando Christian Academy, therefore your child is a unique gift from the Lord to us.

In His Service,

Walkiria Cash Ward

Thank you for partnering up together and let us follow John 3:16 promise, "For God so loved the world that he gave his one and only Son, that whoever believes in him shall not perish but have eternal life."

ABOUT US

MISSION AND VISION:

Our lower school program builds a strong foundation that inspires, educates, and promotes excellence in students. Students are motivated and academically challenged through a well-rounded approach that integrates multiple areas of knowledge.

From kindergarten through 5th grade, students build essential skills in core subjects supported by technology, while projects foster critical thinking and a love for learning.

In middle school (6th to 8th grade), students continue their academic growth alongside classes in music, art, Spanish, physical education, and technology.

The academy also offers a hybrid program for 2026–2027, combining in-class learning with guided at-home work, supported by strong academic performance in standardized assessments.

GRADE LEVELS

Kindergarten is where the foundation of learning begins, helping students develop essential skills in reading, writing, and mathematics through engaging and interactive activities. With the support of classroom technology, children explore new concepts while building confidence, curiosity, and a love for learning.

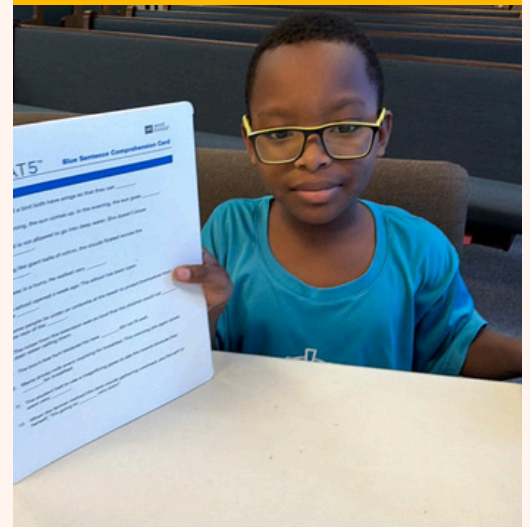

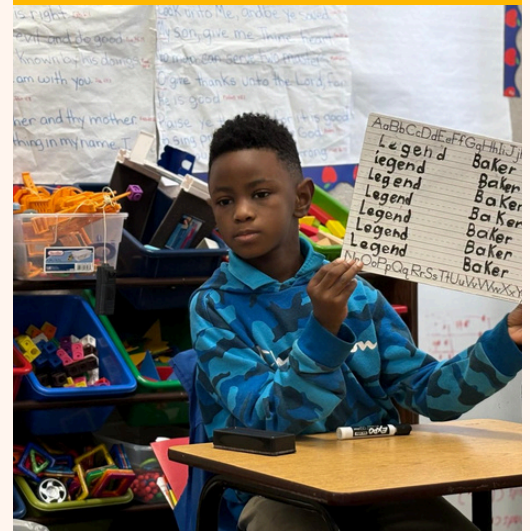

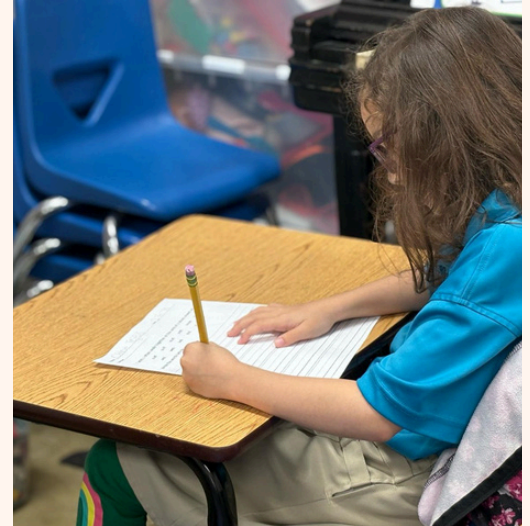

Through a balanced approach that includes both individual and group activities, students strengthen their social, emotional, and critical thinking skills. This early stage encourages creativity, independence, and the development of positive learning habits that prepare them for future academic success.

GRADE LEVELS

In 2nd and 3rd grade, students strengthen their foundational skills in reading, writing, and mathematics while developing greater understanding and confidence in their learning. Through dynamic lessons and the use of technology, curiosity, active participation, and critical thinking are encouraged.

Through individual and group projects, students improve their ability to solve problems, work collaboratively, and express their ideas clearly. This stage promotes independence, responsibility, and a love for learning, preparing them for more advanced academic levels.

GRADE LEVELS

In 4th and 5th grade, students strengthen their academic foundation while developing deeper understanding in reading, writing, mathematics, science, and social studies. Through engaging lessons and the integration of technology, students are encouraged to think critically, ask questions, and take an active role in their learning.

At this stage, students build independence and confidence through projects that strengthen problem-solving, teamwork, and communication. They are prepared for middle school by developing responsibility and organization.

GRADE LEVELS

Middle School is where students evolve into confident, independent learners. Through dynamic instruction and a challenging curriculum, they develop critical thinking, collaboration, and communication skills essential for future success.

With a balance of academics and enrichment classes, students gain the tools they need to grow both intellectually and personally, preparing them for the next level with confidence and purpose.

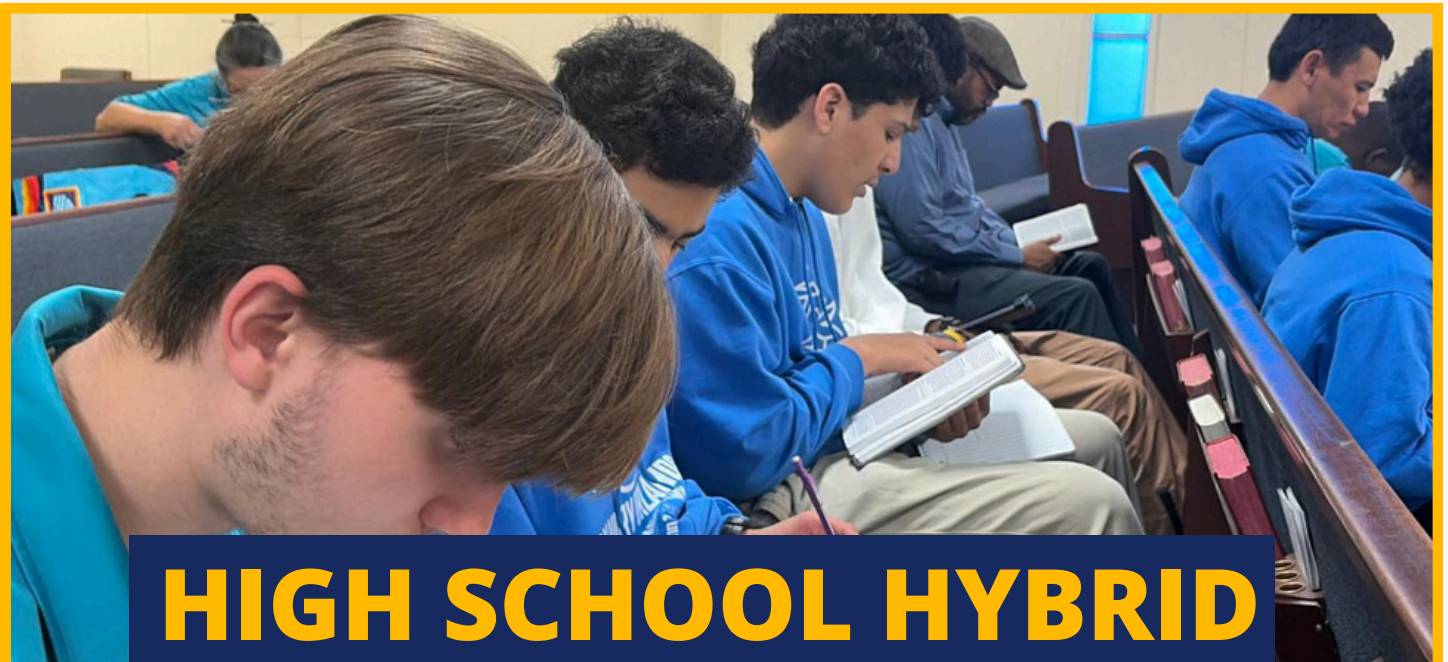

GRADE LEVELS

The High School Hybrid Program offers a flexible and structured learning experience designed for students who seek both independence and academic support. This model combines in-person instruction with guided at-home learning, allowing students to manage their time while staying engaged with a rigorous curriculum.

Through a balance of classroom interaction and online assignments, students develop responsibility, critical thinking, and strong study habits. With the support of teachers and a clear academic structure, this program prepares students for college and future success while adapting to modern learning needs.

HIGH SCHOOL HYBRID

SPECIAL CLASSES

TAEKWONDO

Taekwondo classes help students develop discipline, respect, and self-control while strengthening their physical fitness and coordination. Through basic techniques, dynamic exercises, and guided practice, students improve their confidence, concentration, and self-defense skills, promoting values such as perseverance, teamwork, and consistent effort.

Art classes foster creativity and expression through drawing, painting, and hands-on projects. Students develop imagination, attention to detail, and visual skills.

In a creative environment, they build confidence while exploring different materials and styles, promoting originality and critical thinking.

ART CLASSES

SPECIAL CLASSES

BIBLE CLASSES

Bible classes provide students with a space to reflect on values, character, and purpose through meaningful discussions and lessons. Students explore key teachings that encourage respect, integrity, and positive decision-making in their daily lives.

PHYSICAL EDUCATION

Physical Education classes promote physical well-being and the development of healthy habits through dynamic and sports activities. Students improve their fitness, coordination, and teamwork while strengthening values such as discipline, respect, and perseverance.

EXTRACURRICULAR ACTIVITIES

Extracurricular activities provide students with the opportunity to participate in special experiences and educational trips that enrich their learning beyond the classroom. These activities allow students to explore new environments, cultures, and contexts, fostering curiosity and hands-on learning.

Through these experiences, students develop independence, responsibility, and social skills while creating meaningful memories. They also strengthen their personal growth by facing new situations that broaden their perspective and worldview.
